

Hints:

Do you have a new quizzer? The first year for young quizzers is always the hardest. But the years that follow are AWESOME! Many quizzers become students of the Scriptures for a lifetime. Stick with it-- the long-term results are worth the work!

Try starting your young quizzer off in the Novice League- The speed is much more relaxed, a bit less material to cover, and quizzers that excel in Novice League can always move up to the Little League anytime! Novice League is less about competition and more about encouragement and fun.

Don't forget the Olympic Memory Challenge! Many quizzers are faithful to memorize all their material, but come to the Tournament unable to exercise the art of jumping. The OMC rewards quizzers another way: with certificates that let them know their accomplishment is valuable.

Do you have low-scorers on your team? Not a problem... create a game with-in a game and reward your quizzers afterward with encouragements tailored to their level of participation:

- Count the times they jump and reward a quizzer with a prize for their first jump, their 5th jump and 10th jump, etc.
- Encouraging wrong answers isn't wise, but you can still reward a quizzer for a worthy try or reward them for jumping on a tough question or a non-Blue-Sheet question. They'll continue to put forth A+ effort even with a low score.

Keep your sights aimed at traveling tournaments. Quizzers that attend the Chicago tournament come back with a new level of inspiration. It is hugely rewarding to meet together with hundreds of other quizzers and families that have the same mind and heart for God's Word!
